From:SSP Information <SSPInfo@pittcon.org>

Position Analytical Chemist / Analytical Technician

Hours/Shift Full time, primarily daylight, but some off shift work may be required

Education BS Chemistry, will consider Associate's degree for a qualified candidate

Boron Specialties is a small, woman-owned business and chemical manufacturer, focusing on products that leverage the unique properties of Boron.

Job description

Perform analytical, QA, and QC functions including method development and sample analysis in support of product and application development, manufacturing, and contract research involving boron-related compounds. Experience with titration, GC, and NMR strongly preferred.

Position also will support and perform some synthetic chemistry (primarily inorganic).

Position located near Pittsburgh, PA (no relocation available).

Ideal candidate will excel in a dynamic and safe working environment.
